04 There are two folders "images" and "media".
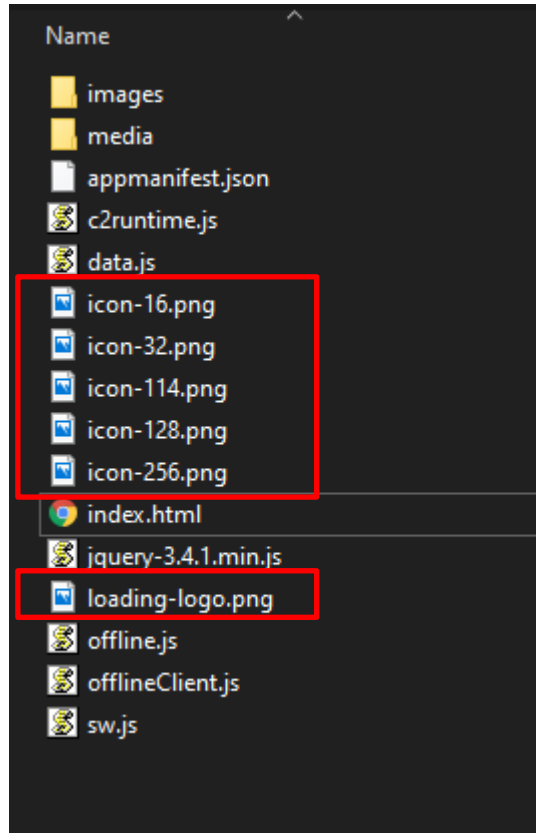

05 Go to "image" folder.

06 You can change and replace your images or edit these images if you need. (Use graphic editing software)

07 Go to "media" folder.

08 You can replace any audio you need. But you have you use same names and same format.

09 If you want to change favicon/icon the change these images in the main folder.

10 After completing all changes. Re zip and upload to your webhost.
